Subject: Just to consider

FEMA is reporting their estimate on damage to houses...

56,269 affected
43,118 minor
13,986 major
6,475 destroyed
119,848 total

Based on my almost perfect estimate of HHW from Katrina, we can expect 100 pounds of HHW from at least the houses that have major or destroyed damage... which would about 1.9 million pounds of HHW...

If you include the minor damaged houses, the amount would go up to approximately 6.3 million pounds of HHW...

We collected over 23 million for Katrina...

With Regards, Steve
